

2022 could be the start of something big...at Briggs

Canterbury Resources Limited (ASX:CBY) is a junior minerals explorer established in 2011, listed in 2019 and assessing large-scale copper-gold plays in the south-west Pacific region. The company has a number of active projects in PNG and Queensland. Drilling at the Briggs Project is now completed with assay results expected in February. The aim of the campaign was to evaluate three distinct porphyry targets and with follow-up work, to support the progress of Briggs to a scoping study stage. Initial results are encouraging. We see the commencement of a scoping study as a critical path item to deliver potentially material value accretion. Notwithstanding weather and COVID-related delays, the remainder of 2022 could see tangible progress on resource definition and partnering across the portfolio, particularly in PNG. Through high working interests, the company has strong leverage to success. The increasing global demand for metals, particularly copper, should provide ready financing options, in a post-COVID, growth economy.

Business model

Canterbury is a junior minerals explorer established with the aim of generating early-stage opportunities for Cu-Au in the south-west Pacific region including northern Australia. The strategy is to identify Tier-1 exploration opportunities, define the commercial opportunity, and seek partnerships to provide funding at the project level. Through partnering, the company is aiming to finance evaluation activity with the Briggs and Bismarck projects funded. Working assets is the critical path to value accretion, particularly in the current bullish copper market.

Drilling completed and Briggs evaluation continues

With the drilling of a 12-hole campaign completed, the evaluation work at Briggs is under way across three mapped porphyry targets. Initial results have been encouraging with sulphide mineralisation evident and consistent with data from the Central Porphyry. The data points to potentially extensive prospectivity across a strike length of up to 2,000m. Assay data, expected to be to hand in February, will form the basis of an updated mineral resource assessment with a likely material expansion to the ascribed 142.8Mt @ 0.29% copper in the Central Porphyry target. Follow-up drilling across the entire strike length could be undertaken post the wet season (Q2 '22). CBY will be carried by Alma Metals through a farm-in arrangement of up to \$16mn.

Valuation is \$0.42/share at the mid-point

We model a risked NAV of A\$52mn (A\$0.42/share at the mid-point) to the portfolio against a **reference share price of A\$0.08/share**. It's worth highlighting that our valuation benchmarks and weightings are subject to significant change through exploration and evaluation activity. Further positive results at Briggs could materially enhance and upgrade the economic potential of the project and support the commencement of a Scoping Study, providing a mechanism to close the current discount and reset the share price base. We suggest that CBY represents an undervalued play, with significantly strong upside as a copper opportunity given the leverage of the portfolio to the metal, particularly via the Briggs asset in Queensland. The next 12-24 months could deliver transformational upside based on material increases and upgrades to existing resources across the portfolio, with a likely return to the field in PNG and initial activity at Peenam.

Share Performance (12 months)

Upside Case

- Partnering options can be secured more rapidly and on better terms than expected
- Drilling results at Briggs support a significant upgrade in resource tonnages
- Successful outcomes catalyse accelerated pre-development options

Downside Case

- Delays in securing partners also defers next-phase evaluation and growth options
- Assay results in particular fail to meet expectations
- COVID issues continue to negatively impact the timing and resumption of in-field activities

Set For A Big Start To 2022

Due to continuing COVID-related impacts and administrative requirements, field activity was limited to the Briggs Copper Project in Queensland and funded by Alma Metals (ASX:ALM) -formerly Africa Energy Resources - under the terms of its partnering agreement. Financing an initial work programme to \$0.75mn secures Alma Metals the option to acquire up to 70% of the Briggs Project for the staged expenditure (out to Jul-2031) of up to an additional \$15.25mn.

The company ended the quarter with a positive cash position (~\$0.74mn) to complement its financial carries at Briggs and Bismarck.

Exhibit 1: December quarter highlights and comments

Exploration and evaluation	
<p>Briggs- CBY 100%</p> <p>A binding term sheet with Alma Metals (ASX:ALM) was executed with ALM now in the position to proceed to the earn-in phase. Through the earn-in phase ALM will have the right to assume up to a 70% JV interest for spending \$15.25mn over nine years, on a staged basis (to 31/07/31).</p>	<p>Drilling of a 1,446m (12 hole) RC campaign has been completed with very encouraging results. The company has noted ‘...significant sulphide mineralisation in the Northern and Southern Porphyries’ and ‘...extensions at the Central Porphyry’ with a broad increase in prospectivity. We speculate that the northern Porphyry may represent a continuation of the Central area along strike.</p> <p>The aim of the drilling was to test additional Porphyry intrusives targets along strike from the Central body and the data has indicated copper mineralisation could extend along 1,500m and associated (historical) soil sampling could support delineation of the prospectivity out to 2,000m.</p> <p>The area of interest has increased materially and in this regard the campaign has ticked the geological box.</p> <p>We note the drilling was planned as a 3,000m programme but was significantly impacted by heavy rains and high groundwater levels.</p> <p>Follow-up soil sampling and drilling programmes will be conducted over the mapped 2km strike length post the end of the wet season (Q2 '22).</p> <p>The sampling work will look to better define the surface extent of the prospective area. The next drilling campaign could be quite extensive, up to 3,000 and grid based. It's likely this will be conducted through H2 '22 subject to final planning and approvals.</p> <p>Assay results should be to hand sometime in February and will underpin a review and update of the current mineral resource estimate of 142.8Mt @ 0.29% associated with the Central Porphyry. The success case should deliver a material expansion and high-grading of the attributable resource.</p> <p>In combination with the follow-up programmes, CBY could progress to an initial Scoping Study stage in the latter half of this year.</p>
<p>Ekuti Range and Wamum – CBY 100%</p>	<p>Ekuti Range - No field activity was undertaken through the review period with planning under way for a soil sampling programme over potential north-west extensions of the Otibanda and Waikanda lodes. The company aims to commence a soil sampling programme in April.</p> <p>Wamum - No field activity was undertaken through the review period with planning under way for a soil sampling programme over potential north-west extensions of the Otibanda and Waikanda lodes.</p> <p>COVID-19 continues to impact the timing and implementation of proposed programmes and may continue to do so through the immediate short-term.</p> <p>Exploration opportunities continue to be considered with the aim to ‘...expand the resource inventory’ including ‘...potential extensions at Idzan Creek and Wamum Creek, where the systems are yet to be closed off’.</p>
<p>Bismarck – CBY 40%</p> <p>Rio Tinto Exploration (PNG) Limited holds a 60% JV interest with the conditional option to increase to 80% and is currently sole-funding work programmes.</p>	<p>The JV completed spectral analysis on 147 samples, the subject of a sampling programme conducted through the September quarter.</p> <p>Interpretation of the results will underpin the planning for the next drilling phase, which could commence sometime in H2 '22.</p> <p>Bismarck remains an opportunity of material significance and drilling is the next logical step to provide definitive evaluation data of mineralisation and prospectivity sitting under the lithocap.</p>
<p>Peenam – CBY 100%</p> <p>The acquisition of Neillkins Pty Ltd was completed and EPM 27756 was granted 18-Nov.</p>	<p>The company is currently completing landowner access agreements ahead of conducting an aircore bedrock sampling programme designed to collect data below the weathering horizon.</p>
Corporate	
<p>Cash position as at 31-December remains comfortable.</p> <p>Major works at Briggs and Bismarck are fully funded through financial carries.</p>	<p>CBY holds a cash balance of ~\$0.74mn against a Q4 operating cost of \$0.27mn Exploration expenditure for the period was ~\$0.35mn.</p>

RaaS is the entity providing the authorised AFSL services to you as a retail or wholesale client.

What Financial Services are we authorised to provide? RaaS is authorised to

- provide general advice to retail and wholesale clients in relation to
 - Securities
- deal on behalf of retail and wholesale clients in relation to
 - Securities

The distribution of this FSG by RaaS is authorized by BR.

Our general advice service

Please note that any advice given by RaaS is general advice, as the information or advice given will not take into account your particular objectives, financial situation or needs. You should, before acting on the advice, consider the appropriateness of the advice, having regard to your objectives, financial situation and needs. If our advice relates to the acquisition, or possible acquisition, of a particular financial product you should read any relevant Prospectus, Product Disclosure Statement or like instrument. As we only provide general advice we will not be providing a Statement of Advice. We will provide you with recommendations on securities

Our dealing service

RaaS can arrange for you to invest in securities issued under a prospectus by firstly sending you the offer document and then assisting you fill out the application form if needed.

How are we paid?

RaaS earns fees for producing research reports. Sometimes these fees are from companies for producing research reports and/or a financial model. When the fee is derived from a company, this is clearly highlighted on the front page of the report and in the disclaimers and disclosures section of the report.

We may also receive a fee for our dealing service, from the company issuing the securities.

Associations and Relationships

BR, RaaS, its directors and related parties have no associations or relationships with any product issuers other than when advising retail clients to invest in managed funds when the managers of these funds may also be clients of BR. RaaS's representatives may from time to time deal in or otherwise have a financial interest in financial products recommended to you but any material ownership will be disclosed to you when relevant advice is provided.

Complaints

If you have a complaint about our service you should contact your representative and tell them about your complaint. The representative will follow BR's internal dispute resolution policy, which includes sending you a copy of the policy when required to. If you aren't satisfied with an outcome, you may contact AFCA, see below. BR is a member of the Australian Financial Complaints Authority (AFCA). AFCA provide fair and independent financial services complaint resolution that is free to consumers.

Website: www.afca.org.au; Email: info@afca.org.au; Telephone: 1800931678 (free call)

In writing to: Australian Financial Complaints Authority, GPO Box 3, Melbourne, VIC, 3001.

Professional Indemnity Insurance

BR has in place Professional Indemnity Insurance which satisfies the requirements for compensation under s912B of the Corporations Act and that covers our authorized representatives.

DISCLAIMERS and DISCLOSURES

This report has been commissioned by Canterbury Resources Ltd and prepared and issued by RaaS Advisory Pty Ltd. RaaS Advisory has been paid a fee to prepare this report. RaaS Advisory's principals, employees and associates may hold shares in companies that are covered and, if so, this will be clearly stated on the front page of each report. This research is issued in Australia by RaaS Advisory and any access to it should be read in conjunction with the Financial Services Guide on the preceding two pages. All information used in the publication of this report has been compiled from publicly available sources that are believed to be reliable. Opinions contained in this report represent those of the principals of RaaS Advisory at the time of publication. RaaS Advisory provides this financial advice as an honest and reasonable opinion held at a point in time about an investment's risk profile and merit and the information is provided by the RaaS Advisory in good faith. The views of the adviser(s) do not necessarily reflect the views of the AFS Licensee. RaaS Advisory has no obligation to update the opinion unless RaaS Advisory is currently contracted to provide such an updated opinion. RaaS Advisory does not warrant the accuracy of any information it sources from others. All statements as to future matters are not guaranteed to be accurate and any statements as to past performance do not represent future performance.

Assessment of risk can be subjective. Portfolios of equity investments need to be well diversified and the risk appropriate for the investor. Equity investments in listed or unlisted companies yet to achieve a profit or with an equity value less than \$50 million should collectively be a small component of a balanced portfolio, with smaller individual investment sizes than otherwise. The science of climate change is common knowledge and its impacts may damage the global economy. Mitigating climate change may also disrupt the global economy. Investors need to make their own assessments and we disclaim any liability for the impact of either climate change or mitigating strategies on any investment we recommend. Investors are responsible for their own investment decisions, unless a contract stipulates otherwise. RaaS Advisory does not stand behind the capital value or performance of any investment. Subject to any terms implied by law and which cannot be excluded, RaaS Advisory shall not be liable for any errors, omissions, defects or misrepresentations in the information (including by reasons of negligence, negligent misstatement or otherwise) or for any loss or damage (whether direct or indirect) suffered by persons who use or rely on the information. If any law prohibits the exclusion of such liability, RaaS Advisory limits its liability to the re-supply of the Information, provided that such limitation is permitted by law and is fair and reasonable.
